Category:Image manipulation software Category:Windows-only software Category:Graphics software Category:Windows multimedia softwareThe iron-sulfur protein nifU is essential for nitrogen fixation in *Rhodospirillum rubrum*. Nitrogenase, the enzyme that fixes atmospheric N₂, is a metalloenzyme composed of two components, the iron-molybdenum cofactor (FeMo-co) and the iron-sulfur protein (FeS). nifU, the product of the nifU gene, has been implicated in the maturation of the FeMo-co in *Azotobacter vinelandii* and in the assembly of the FeS in *E. coli*. Here we describe the results of a functional analysis of nifU in the photosynthetic bacterium *Rhodospirillum rubrum*. The results show that, in the absence of nifU, nitrogenase is inactive and that a step in the assembly of the FeS is blocked in the nifU mutant. However, at variance with the findings in *A. vinelandii*, the mutant *R. rubrum* did not display an increase in the level of Mo-free FeS.**SLEEPY FACES** Our collection of cuddly, soft-toy characters range from the playful to the enchanting. The adorable tykes in our sleepy eyes section are perfect for dousing a sleepy head or getting sleepy ones to kick up their feet and relax. As the owner of a small collection of plush, furry critters of all shapes and sizes, our sleepy eyes section is sure to be a go-to spot for any girl who wants something soft, cuddly and adorable to rest her head on. So many great plushies, so little time! **STORY** Our playful friends think they have the gift of second sight. As they come into contact with their special gift, they begin to levitate and find it harder to focus on the world around them. When the bedtime bell rings, they need to fall asleep before the tower collapses, or the world is obliterated! **ANIMALS** A lot of our plush animals are animals that are familiar to many of us. From the ferocious lion to the gentle tiger, we have them all. You may recognize some of these in other areas of the site, including the Halloween section, Animal Kingdom, and under the part in general terms. We also have items in our 2d92ce491b
