m.ukk.to.Q: android saving
preference via shared preference

does not work I am trying to make an app where i have to save user preferences. So, i implemented a preferences class with static variables like this:

```
public class Preferences { private static int userId = 0; private static int userAge = 0; private static int userGender = 0; public static int getUserId() { return userId; } public static int getUserAge() { return userAge; } public static int getUserGender() { return userGender; } public static void setUserId(int id) { userId = id; }
```

```
public static void setUserAge(int
age) { userAge = age; } public
static void setUserGender(int
gender) { userGender = gender; } }
```

And then 2d92ce491b
