Oct 2, 2019 Adventures of Tintin · Adventures of Tintin: The Secret of the Unicorn · Tintin.. Aug 15, 2019 Here is the list of all adventures of Tintin that include the cast of. Tintin (The Secret of the Unicorn) · Adventure of The Blue .Regulation of the parathyroid glands. The parathyroid glands are the only endocrine glands whose secretory profile mirrors that of the skeleton--which means that their functions change synchronously with the state of the skeleton. This review discusses the mechanisms regulating the secretion of parathyroid hormone (PTH), with special focus on calcium sensing and the cAMP-PKA pathway. The analysis of novel techniques used to understand better the control of PTH secretion has implications for the treatment of many disorders of calcium homeostasis, such as postmenopausal osteoporosis, secondary hyperparathyroidism, and primary hyperparathyroidism.Q: Dapper Convert List to IEnumerable I have a dapper Query and I want to convert that into an IEnumerable. I can't make it work because Dapper seems to be working on the original query and not on my IEnumerable. Here is my code: var allUsers = _db.ExecuteSqlCommand("SELECT DISTINCT AddressId, AddressType " + "FROM dbo.Users u " + "WHERE u.UserId = @userId").ToList(); return allUsers; Now I try to cast this: return allUsers.Cast().ToList(); I get a runtime error that Dapper can't convert from List to IEnumerable because List implements IEnumerable. How can I convert my List to IEnumerable? Note: My purpose is that I try to get all the users and then I would like to select the ones with specific AddressId and addressType A: If you want to convert it to IEnumerable then you need to use it as List instead
