An easy-to-use software to convert your PDF to OFX and import it into any one of Xero, YNAB, MS Money, Sage One, Ace Money, Ariett or other accounts. To begin, simply select a PDF file to be converted. You can do so by choosing the file from local drive, network or FTP server. You also have the option of dragging and dropping PDF files onto the interface. To view the details of the selected PDF document, just double click on it. You may optionally specify if you want to change the order of the transactions inside. You can choose the encoding to be used during the conversion and you can even customize the Memo field. Once done with your PDF conversion, you can open the newly created OFX file and import it into your desired account manager. Portable PDF2OFX is a freeware product developed by Pensoft. A tool for easily exporting transactions to QuickBooks® Accounting Software. It enables you to generate and convert an OFX document that is compatible with QuickBooks®, QuickBooks® Desktop Integration includes some of the features found in the full QuickBooks® (online or desktop) accounting software. It lets you see the most recent transactions, adjust prices, view the balance sheet, and check for errors. [Product Details] Description: Export Transactions to QuickBooks® Accounting Software. Support for: QuickBooks® for Windows and QuickBooks® for Mac What's new in this release: • Added support for QuickBooks Desktop 2015 Fixes: • Fixed an issue with using the QBD/Intuit SSL certificate in the on-screen interface For questions or help, visit: View full description Most of the existing solutions available today offer their users a free, basic download that does not offer the same functionality as a full program. Furthermore, they often require expensive monthly or yearly subscription fees to use the most advanced features, even if one is only required to use a basic functionality of a solution. This is why we have developed CardyMe, a simple and affordable solution that provides an extensive feature set without charging any fees. CardyMe helps you generate a personal and business credit card statement that you can use to save money by automating your monthly credit card processing. CardyMe lets you automate your monthly credit card processing with just a few clicks of a mouse. CardyMe creates a simple and easy to understand statement, printed or PDF, using CSV files as a reference. The files you create with CardyMe can be used to import into QuickBooks® or other accounting software. CardyMe makes it easy to set up: 1) create a bank account for your CardyMe activity 2) create a credit card statement for each of your credit cards 3) define recurring charges (e.g. every month, every three months) or yearly charges and 4) print your statement or export to a PDF. CardyMe is not a generic "auto-biller". It will create a statement only for credit cards. To cover your card-based expenses you may also want to include checks, debit cards and other forms of payment. You need to export your transactions and CSV files from the programs you use to make your payment. This way you can import your statements into CardyMe. 1d6a3396d6
