Sepp Blatter, FIFA President: “We are truly pleased with the new player model that perfectly simulates real-life movements and delivers the most authentic gaming experience for FIFA 22. This time around, we’re using HyperMotion Technology to dynamically animate players in all relevant aspects of on-pitch action, so they move in real time according to the precise movements of their virtual counterparts. We want to give both CPU and GPU players the best possible chance to compete with the real masters.” Technical Director Matt Besler, FIFA Games Studio: “The FIFA squad trusts the level of realism of the new player model – from moves and animations, to on-field conditions and surfaces. The result is even more realistic and exciting game-play as players' ball touches are more realistic in terms of ball speed, height, trajectory and bouncing movement.” The FIFA 20 demo on Xbox One X showcases the best possible visual quality on Xbox One X, with crisper visuals, bolder lighting and more details in the background. The demo also includes the introduction of “Super Graphics”, which takes advantage of the power of the Xbox One X to deliver even more beautiful and immersive experiences for fans. Features Key:

- FIFA 22 introduces “HyperMotion Technology,” which uses motion capture data collected from 22 real-life players playing a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels and on-ball actions is used to power FIFA 22 gameplay.
- Repentech — As a lead producer for FIFA's development, Evangel and David Rutter have been instrumental in FIFA's success — particularly in recent titles. The ability to act as players on the pitch is the next wave of innovation, fuelled by their passion for playing, and not just creating.
- The FIFA eFootball Pro Evolution™ Bowl — the world's first motion-controlled recreation of

the sport using FIFA features. Join five other EA SPORTS FIFA Pro Clubs and make your way to the big stage by completing team-specific challenges from eight challenger teams across the world. Featuring a holographic broadcast of world-class players and more, the fun-filled week-long knockout tournament is the premier event of the EA SPORTS FIFA eFootball Pro Evolution™ Bowl Series, as well as the biggest event in the entire eSports ecosystem.

- A new Live Level editor gives players the power to create their own FIFA Ultimate Team™ stadium pieces. Also including a huge range of player and team kits, players are able to tailor their scene to create a setup unique to their game style.

More ways to play.

- Headers and volleys - An advanced player skill that turns the ball around after it goes past the feet, this skill should be used consciously.
- Angular momentum shooting - Shot transfers the ball's kinetic energy, much like a shot on the fast ball in football. This creates a shot that has significant kick on the ball and can easily go in or over the defense.

FIFA 20 introduces a number of firsts: a new broadcast model, expanded customisation, official partnerships, and enhanced social features. This year's release represents the biggest overhaul of the series to date, as it comes with a new broadcast model, expanded customisation, official partnerships, and enhanced social features. What is FIFA Ultimate Team? EA SPORTS FIFA 20 Ultimate Team gives you new ways to build your dream squad: new Leagues, new players, and a new system to show you how you're stacking up. EA SPORTS FIFA 20 Ultimate Team gives you new ways to build your dream squad: new Leagues, new players, and a new system to show you how you're stacking up. New EA SPORTS FIFA 20 Features Networks, Ratings & Depth The new FIFA Ultimate Team system has an entirely new look, giving you greater control over your squad. This new system offers far greater depth than ever before. With the new system, every player has a set rating. Each rating is determined by a player's potential (how well they match up with you in Ultimate Team), their club's abilities (what level of a team you're creating) and their position on the pitch. So for example, Neymar is a top player, but he's even better when you're playing in an all-star team. By the same token, a lower-league player will have a lower rating when playing in a superstar team. This new ratings system also means that - for the first time in Ultimate Team history - the game now holds individual players to the same criteria as the team they're playing for. That is, players from all-star teams will now have higher potential ratings than lower-league players. It allows us to have many of the details of a player's rating match the team they're playing for. For example, Messi may be a low-rated player in a normal-sized team, but his rating is closer to the top of his rating range in an all-star team. EA SPORTS: FIFA 20 Ratings (Xbox One X Enhanced) Goalkeeper - 89 Defenders - 78 Midfielders - 73 Strikers - 78 Assists/Key Passes - 86 Tackles - 84 Key Pass Accuracy - 86 In-Play - 87 bc9d6d6daa
