Why do we not have a support link in that? I can't even tell if it's a malware download..This invention is directed to novel compositions of matter which are both pharmaceutically active and useful in the treatment of bacterial infections. More particularly, the compositions are tylactone derivatives having significant antibacterial activity. New and more potent antibacterial agents are needed for the treatment of bacterial infections. Presently, no new antibacterial agents having broad-spectrum activity have been found. The antibacterial activity of the compounds of the present invention is superior to that of both cephalosporin antibiotics and penicillins. The compounds of the

present invention are effective against both gram-positive and gram-negative bacterial infections, particularly those caused by *S. aureus*, *S. epidermidis*, *S. pyogenes*, *S. pneumoniae*, *M. pneumoniae*, *H. influenzae*, and other infectious organisms and present an effective alternative to existing antibacterial agents./* *

Windows 7 Loader is based on
Windows 7 as a base OS. But not
the same as what you're probably
thinking. Windows 7 is build from
the ground up for the PC, while the
loader is more of a base OS which

can be built from . Windows 7
